#### **Safety Data Sheet**

Metro-Flo Alkali Page 1 of 5

Section 1 - Product and Company identification

**Trade name**: Metro-Flo Alkali – Liquid Laundry Alkali

#### Manufacturer:

Metro-Chem, Inc.

24 Pennsylvania Avenue

Kearny, NJ 07032

Date Prepared:
Latest Revision:

800-424-9300
973-589-2800
10-08-1987
6-1-2015

Section 2 – Hazard(s) Identification

#### Classification:

Corrosive to metals

Acute toxicity, oral

Skin corrosion/irritation:

Category 4

Category 4

Category 1B

Category 1

Category 1

Category 1

#### Risk Phrases:

R22: Harmful if swallowed R35: Causes severe burns

#### Label:

Signal Word: Danger

#### **GHS Hazard Phrases:**

H290: May be corrosive to metals H302: Harmful if swallowed

H314: Causes severe skin burns and eye damage

#### **GHS Precaution Phrases:**

P103 Read label before use

P234: Keep only in original container

P260: Do not breathe (dust/fume/gas/mist/vapors/spray)

P264: Wash hands thoroughly after handling

P270: Do not eat, drink, or smoke when using this product

P280: Wear protective gloves/protective clothing/eye protection/face protection

## **GHS Response Phrases:**

P301 + P310: IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician if you feel unwell; rinse mouth; do not induce vomiting

P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing

P303, 361, 363, 338: If on SKIN, remove/take off immediately all contaminated clothing, wash before reuse; rinse skin with water or use shower. For severe skin burns, get medical attention.

P304 + 334: IF INHALED: Remove person to fresh air and keep comfortable for breathing

<u>Safety Data Sheet</u> Metro-Flo Alkali Page 2 of 5

Section 3 – Composition/information on ingredients

Potassium Hydroxide CAS No: 1310-58-3 OSHA PEL: 2mg/m³ ACGIH TLV: 2mg/m³ Percentage 45%-60% Sodium Silicate Liquid CAS No: 1344-09-8 OSHA PEL: 2mg/m³ ACGIH TLV: 2mg/m³ Percentage 10%-25%

Section 4 – First Aid Measures

**Inhalation** Move to fresh air. Get medical attention if symptoms occur

**Skin contact** Take off immediately all contaminated clothing. Wash off IMMEDIATELY with plenty of water for at least 15-20 minutes. Get medical attention immediately! Wash clothing separately before reuse. Destroy or thoroughly clean contaminated shoes

**Eye contact** Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a physician or poison control center immediately.

**Ingestion** Call a physician or poison control center immediately. Rinse mouth. If vomiting occurs, keep head low so that stomach content doesn't get into the lung.

Section 5 – Fire Fighting Measures

Not considered to be a fire hazard.

**Extinguishing Media**: Water fog, Foam, Dry chemical powder, CO<sub>2</sub>. Use any means suitable for extinguishing surrounding fire. Avoid direct contact of liquid with water

**Unusual Fire & Explosion Hazards:** The product itself does not burn. May decompose upon heating to produce corrosive and/or toxic fumes. Contact with metal my release flammable hydrogen gas. Not considered to be an explosion hazard.

**Special protective equipment and precautions for firefighters:** Fire fighters should enter the area only if they are protected from all contact with the material. Full protective clothing, including self-contained breathing apparatus, coat, pants, gloves, boots and bands around legs, arms and waist, should be worn. No skin surface should be exposed.

Section 6 – Accidental Release Measures

**Personal precautions, protective equipment and emergency procedures:** Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in Section 8. Isolate hazard area. Keep unnecessary and unprotected personnel from entering.

**Methods and materials for containment and cleaning up**: Large spills: Stop the flow of material if this is without risk. Dike and contain the spilled material when possible. Do not let pure product enter drains. Collect liquid in an appropriate container or absorb with an inert material (e.g., vermiculite, dry sand, earth) and place in a chemical waste container. Small spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Do not flush to sewer! Label and remove for disposal by an approved waste transporter in accordance with Federal State and Local regulations.

Section 7 – Handling and Storage Measures

**Precautions for safe handling:** Use caution when combining with water. DO NOT add water to caustic; ALWAYS add caustic to water while stirring to minimize heat generation. Do not get in eyes, on skin, or on clothing. Do not taste or swallow. Do not breathe mist or vapor. Wear appropriate personal protective equipment when handling product. Always keep product

container in containment when using. Observe all warnings and precautions listed for this product when handling.

**Precautions for safe storage:** Only store in cool, dry, well-ventilated locations. Store in corrosive resistant container with a resistant inner liner. Store away from incompatible materials (See section 10). Store at temperatures not exceeding 104°F. Compatible storage materials may include, but not be limited to the following: nickel, nickel alloys, steel, plastics, plastic or rubber-lined steel, FRP, or Derakane vinyl ester resin. Do not allow the material to freeze.

Section 8 – Exposure Controls/Personal Protection

#### **Control parameters**

## Components with limit values that require monitoring at the workplace:

1310-58-3 Potassium Hydroxide

OSHA PEL 2mg/m³ Ceiling ACGIH TLV 2mg/m³ Ceiling

#### **Exposure Controls**

#### **Engineering Controls:**

A system of local and/or general exhaust is recommended to keep employee exposures below the Airborne Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. An NIOSH-approved eye wash and emergency shower must be available when handling this product.

#### **Personal Protective Equipment:**

**Eye Protection**: Tightly sealed safety goggles or a full face shield where splashing is possible.

Protective Gloves: Compatible chemical-resistant gloves

Protective Clothing: Long sleeves, lab coats or chemical resistant aprons

Respiratory Equipment: NIOSH approved, air purifying respirator, or a NIOSH-approved

SCBA, as conditions warrant.

#### **General Protective and hygienic measures:**

Keep away from foodstuffs, beverages and feed. Wash hands before breaks and at the end of work

Section 9 – Physical and Chemical Properties

Physical State: Liquid

Appearance and Odor: Clear, odorless liquid

Melting Point:No dataBoiling Point:270°FFlash Point:No dataEvaporation RateNo data

Explosive Limits: LEL: No data UEL: No data

Vapor Pressure 6.4 mmHg @ 77°F

Vapor Density (Air = 1) No data Specific Gravity ( $H_2O = 1$ ) 1.2

Solubility in H<sub>2</sub>O Fully miscible

Auto ignition Pt: No data
Percent Volatile No data
PH 13.5

## Safety Data Sheet

Section 10 – Stability and Reactivity

Reactivity: Contact with metal may release flammable hydrogen gas

Stability: Stable if stored in accordance with Section 7

Polymerization Will not occur

Conditions to Avoid: Heat and incompatibles

Incompatibility: Strong acids, oxidizing agents, phosphorus, aluminum, Zinc, tin.

Initiates or catalyzes violent polymerization of acetaldehyde,

Metro-Flo Alkali

Page 4 of 5

acrolein or acrylonitrile.

Hazardous Decomposition

Or Byproducts: Contact with metals (aluminum, zinc, tin) and sodium

tetrahydroborate liberates hydrogen gas.

Section 11 – Toxicological Information

Acute Toxicity: Harmful if swallowed

1310-58-3 Potassium Hydroxide Oral LD $_{50}$ : 273 mg/kg (rat) 1344-09-8 Sodium Silicate Oral LD $_{50}$ : 1960 mg/kg (rat) 1344-09-8 Sodium Silicate Dermal LD $_{50}$ : 4640 mg/kg (rabbit)

### **Primary Irritant effect:**

On the skin: Irritant, possible corrosive if contact is prolonged. Soreness, redness, destruction of skin may result.

On the eye; Irritant, possibly corrosive to eye tissues. Tearing, redness, pain, impaired vision.

Inhalation: Respiratory tract irritant may cause serious burns on acute contact.

Ingestion: Toxic! Corrosive to mucous membranes and may cause perforation of the

esophagus and stomach.

Sensitization: No sensitizing effects known

### Additional Toxicological information:

Chronic Exposure: Development of a defatting dermatitis on prolonged contact with Potassium Hydroxide has been reported.

Carcinogenic categories

IARC – None of the ingredients is listed NTP – None of the ingredients is listed

Section 12 – Ecological Information

Eco toxicity: for Potassium Hydroxide: TLm: 80 ppm/Mosquito fish/24 h/Fresh water

Persistence and Degradability: No data available Bio accumulative Potential: No data available

Mobility in Soil: No data available

Section 13 – Disposal Considerations

Whatever cannot be saved for recovery or recycling should be managed in an appropriate and approved waste facility. If this product becomes a waste, it meets the criteria of a hazardous waste as defined under 40 CFR 261, D002: Waste Corrosive material (ph≤2 or ≥12.5, or corrosive to steel). Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied. State and local disposal regulations may differ from federal disposal regulations.

## **Safety Data Sheet**

Section 14 – Transport Information

UN Number UN3266

UN Proper Shipping Name Potassium Hydroxide, Solution

DOT Proper Shipping Name Corrosive Liquid, Basic, Inorganic, n.o.s.

ADR Hazard Class

DOT Hazard Class 8 Corrosive

Packing Group II
Marine pollutant No

Section 15 – Regulatory Information

# Safety, health and environmental regulations/legislation specific for the substance or mixture

#### **EPA SARA Lists:**

Section 302.4: Potassium Hydroxide Listed Section 304(RQ): Potassium Hydroxide 1,000 Lbs.

SARA 311/312 Hazardous Categorization

Acute Health Hazard
Chronic Health Hazard
Fire Hazard
Sudden Release of Pressure Hazard
Reactive Hazard
Section 313 (specific toxic chemical listings):

Yes
No

TSCA (Toxic Substances Control Act): Potassium Hydroxide

Carcinogens: No Teratogens No Chemicals causing developmental toxicity: No

#### **US State regulations:**

Mass RTK: Potassium Hydroxide (1310-58-3)

NJ RTK:

PA RTK: Potassium Hydroxide (1310-58-3) RI RTK: Potassium Hydroxide (1310-58-3)

CA Prop 65: No
